  - Lions Club
  - Planned Parenthood

Active Partnerships 2018-2019
- 32
For over 30 years, the Centers for Disease Control and Prevention have worked to eliminate health disparities and create healthy communities by funding Prevention Research Centers (PRCs) throughout the United States.

The Healthy Youth Development • Prevention Research Center, housed at the University of Minnesota, Department of Pediatrics, is one of 26 academic centers whose main objective - as a PRC Network - is to link science to practice through collaborations with public health agencies and community-based organizations.
